KSC Safety and Health Days – “DO the RIGHT Thing!”

KSC's Safety and Health Days Program events for 2011 will be conducted during the month of February. This year's theme is “**DO The RIGHT Thing**,” focusing on always doing the right thing where safety is concerned, on or off the job.

Each NASA-KSC directorate will complete a four- to eight-hour safety stand-down. Directorates are encouraged to partner with their contractor counterparts for scheduling and event activities.

Additionally, safety- and health-related booths and specialized demonstrations will be available at HQ, OSB I, OSB II, and the Training Auditorium on pre-identified days throughout the month. The schedule of events is listed to your right. It also is available on the [Safety and Health Days website](#) and will be published in the KSC Daily News.

This year's programmed safety and health training was developed by several KSC organizations to include:

- **Institutional Safety – How Did We Do?:** A look at KSC's 2010 safety and health performance and a video on how to prevent the leading causes of employee injuries on center.
- **Occupational Health / Industrial Hygiene:**
 - 2010 American Heart Association CPR Guidelines and Video
 - Automated External Defibrillator (AED) Awareness
 - KSC Health Focus for 2011 – Dimensions of Wellness
- **KSC Fire and Security:**
 - What to Do in Building Evacuations
 - The Distracted Driver
 - AT&T “The Last Text”
- KSC's OSHA Voluntary Protection Program (VPP) Update
- Chesley Sullenberger Presentation to Johnson Space Center (JSC)
- Australia's Transport Accident Commission (TAC) Driving Safety Video

If you have questions, comments, or a topic you would like to see addressed: please send to Reneka Whicker at reneka.a.whicker@nasa.gov or Brian Gloade at brian.i.gloade@nasa.gov
